Monthly Water Maintenance Program

As part of our comprehensive Monthly Service routine, Rode Pool Services has instigated a year-round 'Water Maintenance Program' that will keep your pool looking its best and your equipment performing to its maximum potential. Our endeavour is to look after your pool and pool equipment better than you can.

4 In 1 Liquid Clarifier

January & May

- Breaks down body fats, sunscreen lotions and oils in the pool water.
- Enhances chlorine sanitising activity.

Aquashield 3

February, July & November

- Prevents scale build up on the pool surface.
- Used for prevention and removal of metal stains on the pool surface.
- Protects salt cell electrodes from calcium build-up. This ensures chlorine production is not inhibited.

Oxyshock

March, September & December

- Eradicates chloramines - the build-up of body fats and oils which can cause sore eyes, itchy skin and odorous water.
- Enhances chlorine sanitisation.
- Regenerates bromine in spa water.

Winteriser

June

- Minimises maintenance during winter period.
- Added to offset the decreased run time of the filtration system.

Pool Algaecide

October (Added October - February)

- Great maintenance protection product, just like having an insurance policy for your pool.
- Possesses long lasting algaecide properties.
- Effective in controlling most algae types.
- Algae Preventative Maintenance - 250ml/50,000lts monthly dose.

Starver

April & August (Added all-year-round)

- Removes algae nutrients (phosphates) from pool water.
- Enhances chlorine production.
- Phosphate Preventative Maintenance - 250ml/50,000lts monthly dose.
