

Winterise your pool and save

Save time and money

Reduce your power bills • Use less chemicals • Extend the life of your pool equipment

How to winterise your pool.

Follow these steps from May through September.

Step 1 Test and balance the pool water and attend to your pool filter;

- Media filter - backwash if required,
- Cartridge filter - clean the cartridge,
- D.E. filter - strip and clean the filter.

Step 2 Super-chlorinate - use 5 times the normal dosage.

Step 3 Add winterising agents;

WINTERISING AGENTS DOSAGES

POOL VOLUME (LITRES)	up to 30,000 lts	30,000 - 60,000 lts	60,000 - 90,000 lts
WINTERISER ALGAECIDE	500 mls	750 mls	1 lt
AQUAGUARD C.S.M.	1 lt	1 lt	1 lt

Step 4 Reduce filtering time according to pool volume and pump type;

SINGLE SPEED PUMP RUN TIME

POOL VOLUME (LITRES)	up to 30,000 lts	30,000 - 60,000 lts	60,000 - 90,000 lts
	1 hour daily	2 hours daily	3 hours daily

VARIABLE SPEED PUMP RUN TIME

SPEED	LOW/ECO	Multiply single speed pump daily run time x 2
	MEDIUM	Multiply single speed pump daily run time x 1.5
	HIGH	The same as single speed pump daily run time

PH LEVEL

Test and adjust pH once a month only.

MANUALLY DOSED CHLORINE POOLS

Add chlorine once a week only, as per the table below.

WEEKLY CHLORINE DOSAGE (MANUALLY DOSED CHLORINE POOLS)

POOL VOLUME (LITRES)	up to 30,000 lts	30,000 - 60,000 lts	60,000 - 90,000 lts
	750 mls	1.5 lts	3 lts

Two new products

- Formulated for winter conditions
- Easy, effective and economical

COMPLETE PROTECTION THROUGHOUT WINTER

- Eradicate and protect against algae
- Inhibit calcium build up, scaling and staining
- Lasts up to 3 months
